DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Objections

The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claims 1-23 have been renumbered 24-46.

Claim 30 is objected to because of the following informalities: the phrase "alternating current" should be changed to "high-frequency voltage" to be consistent with the wording of claim 24. Appropriate correction is required.

Specification

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: The specification lacks a description of the subject matter of claims 31-33 (which correspond to original claims 8-10). Specifically, the specification does not describe an embodiment where both electrode (56) and electrode plate (76) are used at the same time, as is claimed in claims 31-33 given their dependence from claim 24 which requires electrode (56).

Claim Rejections - 35 USC § 112

Claim 29 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is unclear what is encompassed by "low-molecular, cross-linkable, gaseous materials, halogen-containing, silicon-containing, carbon-containing, or metal-organic monomers". Should the phrase read "low molecular weight, cross-linkable, gaseous materials, halogen-containing monomers, silicon-containing monomers, carbon-containing monomers, or metal-organic monomers" instead?

Allowable Subject Matter

Claim 29 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Claims 24-28 and 30-46 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: The closest prior art references are JP 10-35418 and US 6,287,642. JP 10-35418 fails to reasonably suggest the claimed features of provision of a high frequency voltage to the region of the blade oriented away from the protective coating, a device therefore, or cleaning and activating by plasma. US 6,287,642 fails to reasonably suggest the "characterized in that....." features of claim 24 or a device for performing these features as claimed.
